Re: Notice of Potential Liability – Southwest Properties portion of Operable Unit Two of the Wells G&H Superfund Site

Dear Mr. LeMay:

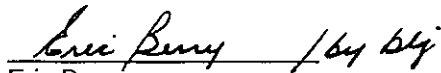

On June 5, 2014, Mallinckrodt received the above-referenced letter from EPA. EPA requested a response within 21 days of receipt; this letter constitutes Mallinckrodt's timely response. In addition, I discussed this matter with Ms. Susan Scott of EPA on June 24th.

First, I need to provide EPA with some updates. Ms. Patricia Duft is no longer with Mallinckrodt. Please address future correspondence to me; my phone number is 314-654-6878. Second, the correct legal entity with respect to this matter is Mallinckrodt US Holdings LLC.

I have carefully reviewed your letter and attachments. I have many questions about the alleged nexus between my client and the site. I would like the opportunity to conduct further review, engage in discussions with EPA and other PRPs, and receive additional documentation. However, at this time, and without any admission of liability, Mallinckrodt is willing to proceed in good faith toward resolving this matter. Mallinckrodt reserves the right to cease participation in the future if determined appropriate.

I look forward to working with you.

Very Truly Yours,

Eric Berry
